Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any future patent term adjustment. See 37 CFR 1.704(b).

Art Unit 1762

- 1 Claims 1-58 remain in the application

Claim Rejections - 35 USC § 112

- 2 The following is a quotation of the second paragraph of 35 U.S.C. 112

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention

Claims 34 and 56 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 34, the term "the third layer" lacks antecedent basis.

With respect to claim 56, the term "the environment" lacks antecedent basis.

Claim Rejections - 35 USC § 103

- 3 The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koster et al. or Tanaka et al. or Fritzenmeier et al. (6,022,832).

Koster et al. or Tanaka et al. Both teach the conventionality of pretreating a superconducting substrate with an etching solution to chemical etch the substrate prior to applying a subsequent coating. Koster et al. further teaches annealing in an oxygen environment can also lead to an improved subsequent coating deposition. Fritzenmeier et al. (6,022,832) teaches conditioning a superconducting surface with a conditioning gas which can include oxygen.

Claims 20-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Konishi et al. (5,728,214).

Konishi et al. (5,728,214) teaches surface treatment of a superconductive oxide in a heated atmosphere including oxygen at 50-200 mTorr subsequent to depositing another superconductive coating.

With respect to the claims which recite specific layers, i.e. buffer layers, biaxially textured layers, polycrystalline layers, etc, it is the Examiner's position that these layers are all conventional in the superconductor art and it would be reasonable for one skilled in the art to have had a reasonable expectation of achieving similar results regardless of the layer that is conditioned as these layers are similar in composition.
